# Industrial Manipulators

Dalmeccan offers a wide range of manipulators, fitted with custom-built tooling for the “weightless” handling of foundry products.

Simple to use, they allow the operator to move products quickly, accurately and safely within the operating area.

The type, design, dimensions and picking systems incorporated in these manipulators are tailored to suit the specific requirements of the user and the varying environmental conditions available.

# FOUNDRY

PMS type Partner manipulator, overhead trolley mounted version, with pneumatic jaws for picking casting dies.

PMS type Partner manipulator, overhead trolley mounted version, fitted with fork tooling for handling ladles or crucibles.

Manipulator equipped with a pneumatic gripper for picking and handling aluminium cylinder heads.

Manipulator with pneumatic gripping jaws for picking and emptying ladles.

17307

PMC type Partner manipulator, column mounted version, equipped with tooling for handling cast-iron covers.

9715507

Manipulator with gripper tooling for picking and tipping casting cores.

9816111

Manipulator with tooling for picking alloy rings, with manual rotation.
